Menu & Inventory

For juice bars, cafés & small kitchens

Know what every drink costs, what to reorder, and who's on shift.

One simple system that connects your menu, ingredients, suppliers and staff, and keeps a live Excel copy of all of it.

HOW IT WORKS

01

Build your menu

Click ingredients into each recipe. Cost, margin and food-cost % appear instantly.

02

Ring up sales

Every drink sold deducts its exact ingredients from stock, automatically.

03

Reorder on time

Low items land on a supplier-ready order list before they run out.

04

Schedule the team

Drag shifts into place and see labor cost next to the day's sales.

~$3,160

estimated monthly value for a bar selling 250 drinks a day*

7 days

from kickoff to go-live, set up with your real menu and team

100%

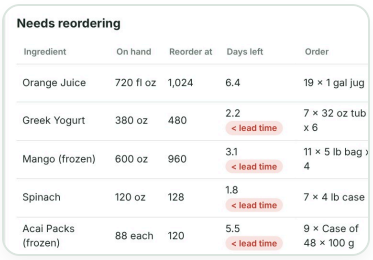

your data, always available as an Excel workbook you keep

*Illustrative estimate from reduced waste, fewer stock-outs, tighter staffing and time saved. Assumptions available on request.

Turn over →

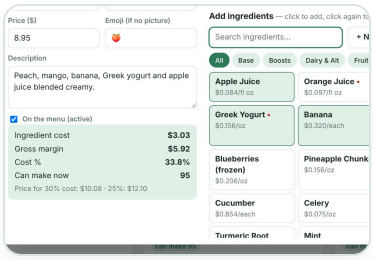

Everything a busy counter needs, in one place

Screens shown are from the working system, loaded with a sample juice bar: 12 drinks, 31 ingredients, 9 suppliers and 6 staff.

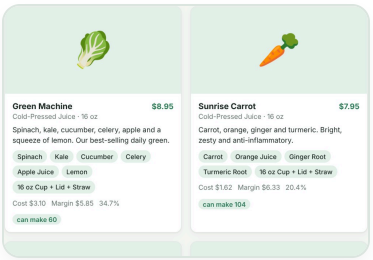

1 Live dashboard

- Reorder alerts with days of stock left
- Warns when stock runs out before a delivery could arrive
- Labor cost this week as % of sales

2 Menu builder

- Photo, description and recipe in minutes
- Live cost, margin and “can make now” count
- Suggested prices at 25% or 30% food cost

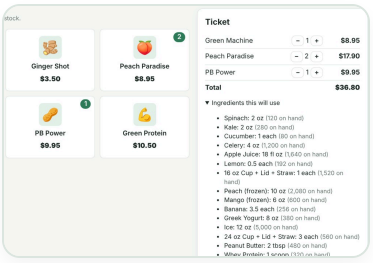

3 Menu at a glance

- Every drink with price, ingredients and margin
- Drinks over target food cost flagged
- See which ingredient limits each drink

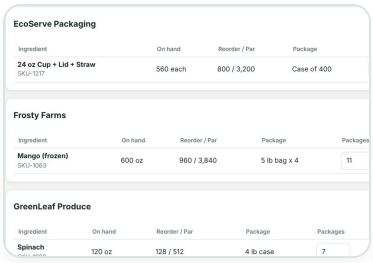

4 Ingredients & suppliers

- Pack size, cost, shipping, lead time, shelf life, minimum order
- True landed cost per oz, piece or scoop
- Which drinks use each ingredient

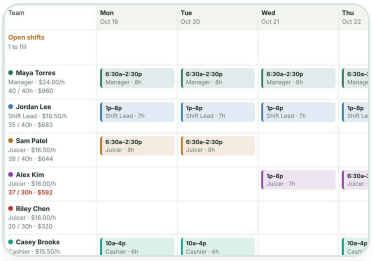

5 Sales that update stock

- Tap drinks onto a ticket
- See exactly which ingredients it will use
- Stock deducted the moment the sale is recorded

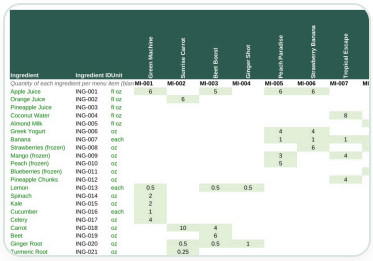

6 Procurement & ordering

- Reorder list grouped by supplier
- Package counts to refill to par, with order totals
- One-click purchase orders; receive to restock

7 Staff scheduler

- Drag-and-drop weekly schedule; copy last week
- Flags overtime, double-booking and open shifts
- Labor cost and labor % by day

8 Live Excel workbook

- Updated after every change, with live formulas
- Where-used matrix, procurement and weekly hours
- Edit in Excel and import changes back

Works in any web browser on the computer you already have. No new hardware required.

What’s included

- ✔ Setup with your real menu and recipes
- ✔ Your suppliers and ingredient costs loaded
- ✔ Your staff and shift times
- ✔ Reorder points tuned to your sales
- ✔ Hands-on staff training
- ✔ Follow-up support after go-live

See it with your own menu

Book a 30-minute demo. Bring your menu and we’ll show you the cost of every drink on the spot.
