Manager knowledge check

15 questions on looking after staff accounts, sales imports, ordering, counts and variance, fixing mistakes, costs and the schedule. About 15 minutes.

Name _____ Date _____ Score / 15

Circle one answer for each question. Use the Manager guide if you're unsure, then check with your manager. Pass mark: **13 out of 15**.

Sam can't remember their password.

1. **What do you do?**

- ◯ **A** Settings → Users → Reset password, give Sam the temporary password in person; Sam chooses their own at sign-in
- ◯ **B** Look up Sam's password on Settings
- ◯ **C** Create a second account for Sam
- ◯ **D** Ask the owner to delete Sam's account

You add Riley as a new staff member.

2. **Which step makes Riley's name appear on deliveries, counts and waste they log?**

- ◯ **A** Choosing a strong temporary password
- ◯ **B** Giving Riley the manager role
- ◯ **C** Linking the user to Riley's Employee record
- ◯ **D** Nothing; it's automatic

Today is Alex's last day.

3. **What should you do?**

- ◯ **A** Nothing
- ◯ **B** Disable Alex on Settings → Users, and Remove from roster on the Schedule
- ◯ **C** Change Alex's password
- ◯ **D** Delete Alex's past shifts

You'd like Jordan to become a manager.

4. **Who can do that?**

- ◯ **A** You, on Settings → Users
- ◯ **B** Jordan, under My account
- ◯ **C** Anyone with a staff account
- ◯ **D** Only the owner

You imported Tuesday's till file a second time by mistake.

5. **How do you fix it?**

- ◯ **A** Do a full stock count
- ◯ **B** Delete the sales one by one
- ◯ **C** Record Sales → Import history → Undo on the extra import
- ◯ **D** Ask the owner to restore a backup

During an import, “Gift Card ($25)” has a red bar.

6. **What do you choose for it?**

- ◯ **A** Ignore — not a drink
- ◯ **B** The most expensive drink
- ◯ **C** Leave it; the import will work anyway
- ◯ **D** Delete the row from the CSV

You create a purchase order for Frosty Farms in Procurement.

7. **What happens with the supplier?**

- ◯ **A** The app emails it to them
- ◯ **B** The supplier sees it on their portal
- ◯ **C** It's sent when someone receives it
- ◯ **D** Nothing yet: you still place the order with the supplier yourself

The Dashboard shows mango with a red “< lead time” tag.

8. **What does it mean?**

- ◯ **A** Mango is late
- ◯ **B** At current use, mango runs out before a new delivery could arrive: order today
- ◯ **C** Mango is over-stocked
- ◯ **D** Mango's price went up

Each weekly count shows strawberries about 6% short of what sales and waste explain.

9. **What's the most likely cause to look into first?**

- ◯ **A** Over-portioning, unlogged waste, or theft: check scoops and recipes, and remind staff to log waste
- ◯ **B** The app is broken
- ◯ **C** The supplier short-ships every week
- ◯ **D** Counting in the wrong week

A count shows mango 1,100 oz short when it's usually close.

10. What's most likely?

- ◯ **A** Theft of 1,100 oz
- ◯ **B** A price change
- ◯ **C** Someone counted packages instead of oz; recount using the “1 pkg = …” line
- ◯ **D** The Excel file is open

Several items show a positive variance (more on the shelf than expected).

11. Which is a likely cause?

- ◯ **A** Too much waste was logged correctly
- ◯ **B** Sales were both rung up on Record Sales and imported from the till
- ◯ **C** A supplier price change
- ◯ **D** The schedule is wrong

A staff member logged 24 oz of spinach as waste instead of 2.4 oz.

12. How do you fix it?

- ◯ **A** It can't be fixed
- ◯ **B** Record a sale of spinach
- ◯ **C** Edit the spinach on-hand number on Ingredients
- ◯ **D** Counts & Waste → Waste log → Remove that entry, then log the right amount

A delivery was checked in with 7 cases received instead of 5.

13. How do you correct the stock?

- ◯ **A** Undo the receipt
- ◯ **B** Log 2 cases as waste
- ◯ **C** Do a stock count of that item so on-hand matches the shelf, and add a note
- ◯ **D** Re-import the till file

Kale's price went up and Green Machine is now above your food-cost target.

14. Where do you see this, and what are your options?

- ◯ **A** Dashboard → Cost changes; tweak the recipe, raise the price, or find another supplier
- ◯ **B** Only in Excel; nothing can be done
- ◯ **C** Receiving log; reject the delivery
- ◯ **D** Schedule; cut hours

15. On the Schedule, what happens if you hold Ctrl (or Alt/Option) while dropping a shift on another day?

- ◯ **A** The shift is deleted
- ◯ **B** The shift is moved
- ◯ **C** Nothing
- ◯ **D** The shift is copied there, and the original stays

Answer key

For the person marking. Go over every wrong answer with the person, using the guide section listed.

Pass: 13 or more out of 15

Below 13: re-read the sections for the questions missed, practise on the app with a manager, and take it again.

#	Ans	Why (and where to read more)
1	**A**	Nobody can see passwords; a reset gives a temporary one that must be changed. (Manager guide 2)
2	**C**	The Employee link fills in who received, counted or logged. (Manager guide 2)
3	**B**	Disable signs them out at once; removing from the roster opens future shifts and keeps past ones for labor history. (Manager guide 2)
4	**D**	Managers look after staff accounts only; roles and manager accounts are for the owner. (Manager guide 1, 2)
5	**C**	Undo removes that import's sales and puts the ingredients back. (Manager guide 4b)
6	**A**	Things that aren't drinks are ignored; the choice is remembered. The import won't run until every name is matched or ignored. (Manager guide 4b)
7	**D**	The app records the order and what's expected; it doesn't send it. (Manager guide 4c)
8	**B**	Days of stock left is less than the supplier's lead time. (Manager guide 4a)
9	**A**	A steady shortfall on one item usually points to portions or unlogged waste. (Manager guide 6)
10	**C**	Huge differences are usually a unit mistake. (Manager guide 6)
11	**B**	Double-counted sales (or a delivery received twice) make the system expect less than is really there. (Manager guide 6)
12	**D**	Removing a waste entry puts the stock back. (Manager guide 3)
13	**C**	Receipts and hand-rung sales can't be undone; a count sets stock to what's really there. (Manager guide 3)
14	**A**	Cost changes show each price change and its effect on every drink. (Manager guide 6)
15	**D**	Dragging moves a shift; holding Ctrl or Alt copies it. (Manager guide 5)
