Menu & Inventory

For juice bars, cafés & small kitchens

Know what every drink costs, what to reorder, and who's on shift.

One simple system that connects your menu, ingredients, suppliers and staff, and keeps a live Excel copy of all of it.

HOW IT WORKS

01

Build your menu

Click ingredients into each recipe. Cost, margin and food-cost % appear instantly.

02

Ring up sales

Every drink sold deducts its exact ingredients from stock, automatically.

03

Reorder & receive

Low items land on a supplier-ready order list, and deliveries are checked in item by item.

04

Schedule the team

Drag shifts into place and see labor cost next to the day's sales.

9 tools

menu, costing, ingredients, sales, ordering, receiving, scheduling, dashboard and Excel in one system

Live Excel

a workbook with working formulas, updated after every change

Everything a busy counter needs, in one place

Screens shown are from the working system, loaded with a sample juice bar: 12 drinks, 31 ingredients, 9 suppliers and 6 staff.

1 Live dashboard

- Reorder alerts with days of stock left
- Warns when stock runs out before a delivery could arrive
- How many of each drink you can still make

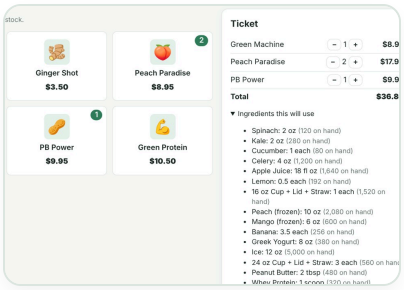

2 Menu builder

- Photo, description and recipe in minutes
- Live cost and margin; high food cost flagged
- Suggested prices at 25% or 30% food cost

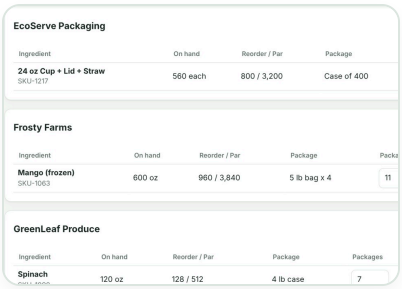

3 Ingredients & suppliers

- Pack size, cost, shipping, lead time, shelf life, minimum order
- True landed cost per oz, piece or scoop
- Which drinks use each ingredient

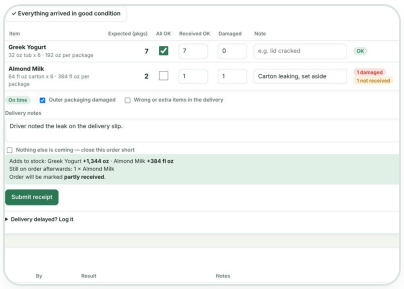

4 Sales that update stock

- Tap drinks onto a ticket
- See exactly which ingredients it will use
- Stock deducted the moment the sale is recorded

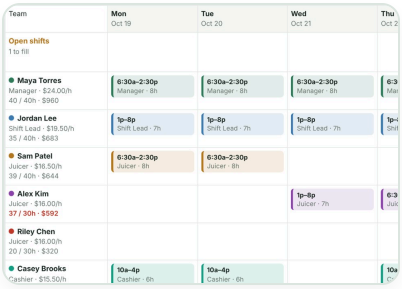

5 Procurement & ordering

- Reorder list grouped by supplier
- Package counts to refill to par, with order totals
- One-click purchase orders with expected dates

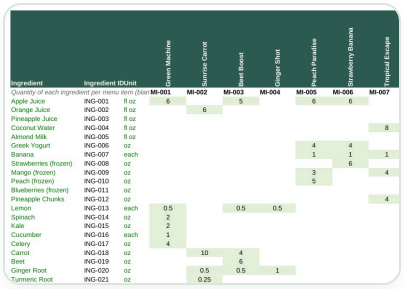

6 Receiving deliveries

- Check each item off against the order, with who and when
- Log damage, shortages, late or wrong deliveries
- Good items go into stock; missing ones stay on order

7 Staff scheduler

- Drag-and-drop weekly schedule; copy last week
- Flags overtime, double-booking and open shifts
- Labor cost and labor % of sales by day

8 Live Excel workbook

- Updated after every change, with live formulas
- Where-used matrix, procurement and weekly hours
- Edit in Excel and import changes back
